

# Siemens' Additive Manufacturing Network

Drives Business Efficiency  
Increasing ROI for Buyers  
and Suppliers

## PART SUPPLIERS

Boost your **employee efficiency** while **lowering your OPEX** by digitalizing and automating your order process and production with the AM Network

## PART BUYERS

**Accelerate the adoption** of AM technologies in your products and operations while increasing your organization's AM competency

### THE COLLABORATION BETWEEN SUPPLIERS AND BUYERS ON THE AM NETWORK

**Eliminating mistakes** leads to lower wasted materials, post process, maintenance, etc

**Fully digital process** allows higher agility in responding to customer requests

**Increase machine utilization** through improved planning and scheduling of processes and orders

**Eliminate mistakes** and iterations by pre-qualifying your designs and specifications

**Fully digital process** allows full process traceability to validate quality products

Managed online collaboration with suppliers and experts leads to **increased competency and productivity**

**50%** Fewer iterations to acquire an order

**-35%** Time spent on facilitating an order

**60%** Less mistakes that require rework

**33%** Typical YoY growth of demand for AM parts

**Higher competency** through advanced knowledge sharing

**25%** Increase in satisfaction with delivered parts
